

ABSTRACT OF THE DISCLOSURE

The present invention relates to a bodyboard structure including a base board having multiple outer surfaces; and a plastic film enclosed around all of the multiple outer surfaces of the base board in a close and seal manner, thereby protecting the entire bodyboard structure. The present invention also relates to a bodyboard structure including a base board having multiple outer surfaces and a bottom face; a bottom plate mounted on the bottom face of the base board; and a plastic film enclosed around all of the multiple outer surfaces of the base board in a close and seal manner, thereby protecting the entire bodyboard structure.
